

Installation

Using VI PM you need to install:

1. JKI HTTP REST Client
2. JKI State Machine

Mock REST API server

For running REST API server based on Json-Server

(<https://github.com/typicode/json-server>) you need to have **node.js** and **npm**.

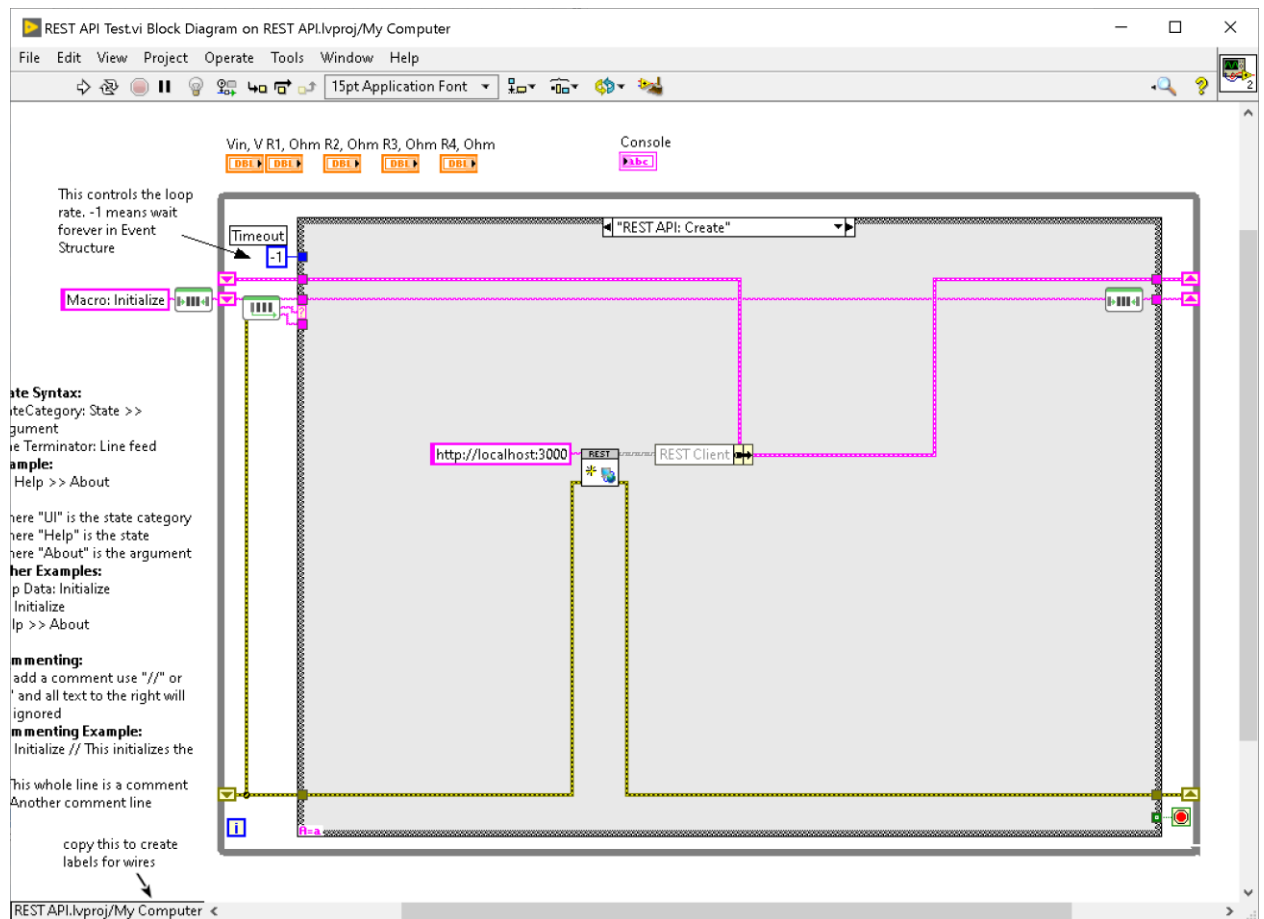

Can be downloaded from here <https://nodejs.org/en/>

Labview source code

Program use JKI State Machine template. If you want to know more please visit:

<https://github.com/JKISoftware/JKI-State-Machine>

For change REST API server go to “**REST API: Create**” state

Requests endpoints can be changed in "REST API: Get" and "REST API: Post" states
